Front End | Back End | Game & APPs

Evening my name is Domingo Dunlap, I am an experienced Full Stack Developer seeking a swift and sincere counsel, hoping to expand my skills, knowledge, and name in the Computer Science Field. With my strong technical skills, extensive experience in web development, and a passion for creating innovative and efficient solutions, I believe I would be a valuable addition to your team.

As a full stack developer, I have successfully designed, developed, and deployed a wide range of web applications. My proficiency in HTML5, CSS3, and JavaScript, coupled with my expertise in front-end frameworks such as React and Angular, enables me to create intuitive and visually appealing user interfaces. Additionally, my knowledge of back-end technologies like Node.js, Next.js, and Express.js allows me to build robust server-side components and RESTful APIs.

I have a solid understanding of database design and management using both SQL (MySQL, PostgreSQL) and NoSQL (MongoDB) systems. With my experience in version control (Git) and cloud platforms (AWS, Azure, GCP), I am adept at collaborating with cross-functional teams and ensuring efficient code management and deployment processes.

Throughout my career, I have consistently delivered high-quality code and exceptional user experiences. I am a strong advocate for clean coding practices, test-driven development, and continuous integration and delivery (CI/CD) pipelines. I thrive in agile environments, actively participating in sprint planning, daily stand-ups, and code reviews to ensure successful project outcomes.

Beyond my technical abilities, I possess excellent problem-solving skills, a detail-oriented mindset, and effective communication abilities. I am constantly seeking opportunities to expand my knowledge and stay updated with emerging technologies and industry trends. My goal is to be a name that is spoken with praise and admiration in the Computer Science field.

I am excited about the possibility of joining your company and contributing to your mission of delivering innovative solutions to clients. I am confident that my skills and experience make me a strong fit for this position, and I am eager to discuss how I can contribute to your team's success.

Thank you for considering my application. I have attached my resume for your review. I would welcome the opportunity to discuss my qualifications in more detail through an interview. Please feel free to contact me at your earliest convenience.

EXPERIENCE

StatGear, Fort Lauderdale Fl — Full Stack Developer

July 2022 - Present

Designed and developed responsive web applications using HTML, CSS, and JavaScript. Implemented front-end frameworks (React) and integrated RESTful APIs for seamless data retrieval and manipulation. Built robust and scalable back-end systems using Node.js and Next.js. Implemented authentication and authorization mechanisms for enhanced security. Designed and implemented a responsive e-commerce website with features like product catalog, shopping cart, and payment integration using Angular, Node.js, and Stripe/Paypal.

The Creative Circus, Atlanta GA — Junior Dev

August 2020 - January 2022

Developed a real-time chat application using React, Node.js, and Socket.io for seamless communication between users. Created a RESTful API for a blogging platform using Express.js, MongoDB, and JWT authentication. Conducted code reviews and provided constructive feedback to team members. Stayed up-to-date with the latest industry trends and emerging technologies to drive innovation within the team.

Liquid 8 Pawn, Key West — IT Broker

July 2022 - November 2022

Troubleshoot computers, phones, and various other devices. Navigating CMD prompt to factory reset. Customizing display lighting.

SouthernMost Mansion, Key West — Creative Technologist

January 2021 - August 2022

Designed and developed a responsive web application built to function as a POS & KOS using HTML, CSS, and JavaScript. Implemented front-end frameworks (React) and integrated RESTful APIs for seamless data retrieval and manipulation. Collaborated with the UI/UX team to create visually appealing and user-friendly interfaces. Actively participated in agile development processes, including daily stand-ups, sprint planning, and retrospectives. Worked closely with cross-functional teams to ensure timely project delivery and high-quality output.

EDUCATION

The Creative Circus, Atlanta GA — Creative Technologist Cert

June 2020 - December 2021

Obtained Certification in Creative Technology, by showcasing above average coding prowess.

PROJECTS

Flatetarium—*2D Planetarium*

Watch planets circle the Sun at a fraction of their actual speed, tapping or clicking the planets pulls up info on that planet. Utilizes Web Animation and api manipulation.

Uses: GSAP, JS, AXIOS, AJAX, CSS, AND SCSS

Moving Mandalorian—*Animated Poster*

A favorite of mine, moving posters are the coolest. Here I used GSAP, JS,, and SCSS to animate a Mandalorian poster.

Uses: GSAP, JS, CSS, AND SCSS.

Glazed—*Donut Shop Website*

When I heard my family was buying a donut shop I knew I had to make them a website! This is by far one of my favorite projects.

Uses: GSAP, JS, CSS, AND SCSS

SpotStats—*Personal Spotify Stats*

A website I co-created with three other classmates. This website uses a Spotify API to display the users most played songs, artists, and albums. A favorite part of this project was working on the spiraling SVG Sound Wave.

Uses: GSAP, AXIOS, AJAX, CSS, AND SCSS

Safe Travels—*Crime Rate Travel Map*

Being an avid roadtripper, I wanted something that I could use to ensure I wasn't ever driving into the wrong area. So using a nationwide county crime api and an api for the electoral color map, I developed a google based map that could do that and more.

Uses: AXIOS, AJAX, CSS, AND SCSS

Builds

Edd.e—Face-Tracking Webcam

Plug in this adorable little device and initiate the program on your computer, and Edd.e wakes up and begins searching the room for a face. Once he finds a face, he locks onto it and follows it all over the room. He also comes with an included bashful/guilty mode.

Nerf + Ultra—Automatic Nerf Turret

Prototype for a great project I have planned. In this prototype I autonomized a nerf revolver, wiring it up with a motion detector and ultrasonic distance trip-wire. Making it into a great little mobile nerf turret trip wire.

In the dynamic field of web development, staying updated with the latest trends and technologies is crucial. Employers and clients often look for web developers proficient in popular programming languages such as HTML5, CSS3, and JavaScript. Having expertise in front-end frameworks like React, Angular, and Vue.js, as well as back-end technologies such as Node.js, Express.js, and Django, is highly sought after. Full-stack developers with knowledge of database management systems like MySQL, PostgreSQL, and MongoDB, as well as experience in building and integrating RESTful APIs, are in high demand. Proficiency in version control systems like Git and familiarity with cloud platforms such as AWS, Azure, or GCP are also desirable skills. Additionally, web developers who have experience with agile development methodologies, containerization tools like Docker, and a strong understanding of responsive design and user experience principles are highly valued in the industry.

- HTML5, CSS3, JavaScript
- Front-end frameworks: React, Angular, Vue.js
- Back-end technologies: Node.js, Express.js, Django, Ruby on Rails
- Database systems: MySQL, PostgreSQL, MongoDB
- RESTful API development and integration
- Version control systems: Git, SVN
- Cloud platforms: AWS, Azure, GCP
- Containerization and orchestration: Docker, Kubernetes
- Agile development methodologies: Scrum, Kanban
- Responsive design and mobile-first development
- Test-driven development (TDD) and unit testing
- Security best practices and authentication mechanisms
- Server administration and deployment
- Continuous integration and delivery (CI/CD)
- Debugging and troubleshooting
- UI/UX design principles
- Performance optimization and scalability
- Cross-browser compatibility
- Collaboration and teamwork
- Problem-solving and analytical thinking
